

6" Ultimate™ Adjustable Basketball System

Add a gymnasium quality height adjustable system to your driveway. This official size 42" x 72" TruGlass™ backboard and breakaway goal have all the specifications of our competition equipment! The massive, 6" square pole is going to last a lifetime. The backboard is positioned 51" from the pole at 10' goal height. Safe play area extends to 64" at 8' and the system features backboard and pole padding for greater safety when the goal is lowered. A turn of the crank adjusts goal height between 10' and 7 1/2'. Off-glass goal mounting protects the backboard from stress when players contact the rim during slam dunk action.

A Supreme Court will prep your neighborhood for tournament play!

Basketball System

Relive your playing days or let the kids practice on a system that duplicates the features of competition equipment used in nearly every college and high school in America. It takes a massive 6" square pole to mount this official sized competition TruGlass™ backboard and breakaway goal. At 42" x 72", the backboard has twice the surface area of most residential basketball systems. Let the action get competitive under the board, there's a full 60" safe play area and a 2" thick pole pad protects to 6' height. Goal can be installed at any height down to 7 1/2' for players of all ages. Competition-style DuraSkin® padding covers the backboard's lower edges and corners. No one offers a more competitive home court!
